Our Boy Scouts

The Electro-Technical and Aeronautics Club

Prof. Oscar Werwath, Hon. President.

Mark Young, President.

Lieut. Charles Lund, Ex. Secretary.

Paul Barkhausen, Secretary.

Caesar Fee, Treasurer.

The members of the club will meet regularly in the School of Engineering. Every Tuesday evening at 7:30 sharp the meetings will start and tardiness will be an offence, punishable by a fine of five cents for each occurrence. Absence will be punishable by a penalty of ten cents for each offence. Being absent means losing track of the work and the possibility of making it up is very small.

The aim and purpose of this club is purely educational; it is to teach the boys how to use a laboratory, to learn the principles of electricity, radio work and telegraphy, and to learn something about aviation.

Prof. Werwath will give a gold medal to the best student in the class. The attendence, behavior and all work will be taken into consideration. The final examinations will be held in April, at which time the boys will be expected to qualify for the merit badges in Electricity and Aviation, and probably in signalling and wireless. There is a great possibility of building an aeroplane controlled by wireless.

NOTICE.

The Kustodian's Club will meet in their headquarters at the rear of 415 Marshall Street on January 15, at 12 midnight. An important subject is before you. Everyone is urged to be present.

D. A. Allen, *Secretary.*
